

I am Alain J Leclerc, CEO of [alainleclerc.com](http://alainleclerc.com), and writer under the pen name Alain Leclerc.

My 2nd book: [An American philosophy: a way of living \(Second Edition\)](#).

I began to write this book in the '90s because I was concerned about the environment, and because I have a degree in Philosophy, I described the environment from a philosophical view, and so it comes to Environmentalism. I have studied the concept and wrote about it.

Now, I will tell you how I made it.

First I used sciences: human, physical, and natural sciences, to analyze the concept. I look at the individual, the society, and nature and link them together. The chapters talk about philosophy, theology, liberty, morality, psychology, sports and arts, politics and economics, and best of all, environmentalism. They all connect as it is about life, especially the life that we, North American people, live, according to my perception, of course.

[An American philosophy: a way of living \(Second Edition\)](#) is my masterpiece. I wrote my first book in a fictional way, a novel, you know, to express myself in words. However this book is about what I know, I see, I have learned, and seen that I am a writer, I use my skills to show it to you, to share with you my knowledge, and hopefully to inspire you and give you some wisdom to help you make good decisions with the best knowledge possible for you to have a good living and be happy. That's the feeling I received by doing it.

It is a book of knowledge and sciences that means everything in life, physically, spiritually, and naturally. It is a big book with a lot of words but filled with a good spirit and wisdom.

So, I hope you will like its contents and be inspired to have more knowledge to better act in this world, for you and the next generations, because we are all concerned with making this world, a better world.

It is my pleasure, my honor, to present to you: [An American philosophy: a way of living \(Second Edition\)](#).

Good reading! Thank you!
